

## **RY36 KWIKSET CYLINDER REMOVAL TOOL**

### **Do Much Kwikset Rekeying?**

**The Rytan Cylinder Removal Tool** pops the cylinders out popular “400” series knob locks in a jiffy! The self-aligning design insures that the expanding tips come in direct contact with the locks retaining clips every time. Simply insert the tool and push the spring loaded handle and the cylinder pops out!

**Whether you are a large high volume shop** or an individual who likes quality tools you will appreciate the Rytan RY36 Kwikset cylinder removal tool.

**This high speed tool is ideal for rekeying** those large Kwikset installations. The ease at which this tool performs its job is reason enough to own one...It's safe and effective at removing all but the most stubborn cylinders.

**The tool is operated by pushing the spring loaded handle.** This pushing action causes two blades (concealed within the body of the tool) to extend outward onto the lock's retaining clips. Pushing the tool's spring loaded handle all the way causes the lock to pop out of the knob. One swift motion does it every time!

**No more sore hands and bruised fingers** when you use this professional tool. No more struggling with screwdrivers or other makeshift tools to get these simple but sometimes troublesome locks apart.

**Replaceable blades are always available.** The blades in your tool do all the work and they're replaceable. You can take this tool apart in less than a minute, rebuild it with new blades and your Kwikset cylinder removal tool is back in service again.

**REPLACEMENT BLADES ARE AVAILABLE.** ORDERS PACK OF FIVE RY36RB

**Once you've tried this tool you'll never go back!**
